# 1 Plexaar assigning premission and roles apis:

Today,I have tested the plexaar apis.I will share the postman collection.These are the apis in which i faced the issue.

## Customer:

- Customer is not creating.

## eventTypes:

- **addNewEvent:** api it is not working.

## Premission:

- **getAllPremission** api it is not working.
- **updatePremission** api is not working.
- **removePremisison** api is not working.

## eventPremission:

- The **eventTypes:** api is not working so i can not set premission against these events.

## Roles:

- **addNewRole** This api is working but other apis are not working.

## RoleEvents:

- It need event Id in order to give role but our event type collection is not working.

## UserRoles:

- **assignUserRole** It is creating role but other api is not working.

# 2 Admin site sms template

Waiting response from developer side as pervious issue was not resolved and now it is in progress.

# 3 Chat and Call module

It still need to be tested.
